

Sprint 2 Week 1 – Functional Testing Evidence

Team 40 / Team B – Intern Management System

Independent review of Mentor Task Assignment and Intern Task Management workflow

Test date: 20 September 2026

1. Testing Scope

This document records independent functional testing of the Sprint 2 Week 1 Task Management vertical slice. The implemented flow was run locally from the latest main branches of the frontend and backend repositories against the shared Supabase project.

The test covered Mentor task assignment, required-field validation, database persistence, Intern assigned-task visibility, task-detail accuracy, and the Assigned → In Progress status transition.

2. Test Result Summary

Test Area	Expected Result	Observed Result	Result
Mentor Task Assignment	Valid task can be assigned to an Intern.	Task was created successfully and confirmation was displayed.	PASS
Required Fields	Incomplete submission is rejected with validation feedback.	Incomplete form was rejected and a clear required-fields error was displayed.	PASS
Database Persistence	Created task is stored with correct task data and initial status.	Example_20 Sep appeared in Supabase with due date 21/09/2026, Medium priority and Assigned status.	PASS
Intern Assigned-Task Viewing	Assigned task appears in the Intern task list.	Example_20 Sep appeared in My Tasks with Assigned status and Medium priority.	PASS
Task Detail	Stored task metadata is displayed correctly.	Title, description, due date, Assigned By, status and priority matched the created task.	PASS
Assigned → In Progress	Intern can start an Assigned task.	Start task changed the status to In Progress.	PASS

3. Evidence

3.1 Mentor Task Assignment and Validation

A valid test task named “Example_20 Sep” was prepared with description “Example_20 Sep”, due date 21/09/2026, assigned to Test Connection, and Medium priority.

The screenshot displays a web form for assigning a mentor task. The form contains the following elements:

- Task title ***: A text input field.
- Description ***: A larger text input field.
- Due date ***: A date input field showing "20/09/2026".
- Assigned intern ***: A dropdown menu with the placeholder text "Select an intern...". Below it, a small note states: "Account information is loaded from the shared IMS account and profile data."
- Priority**: Three radio button options: "Low", "Medium" (which is selected), and "High".
- Assigned by**: A text input field showing "Test Connection (you)".
- Validation message**: A red-bordered box with the text "Please complete all required fields."
- Assign task**: A dark blue button located at the bottom right of the form.

Figure 1. Valid Mentor Task Assignment input before submission.

A separate incomplete submission was attempted to confirm that required-field validation prevents task creation.

The screenshot shows a task assignment form with the following fields and controls:

- Task title ***: A text input field.
- Description ***: A text area.
- Due date ***: A date input field showing **20/09/2026**.
- Assigned intern ***: A dropdown menu with the placeholder text **Select an intern...**. Below it, a small note reads: *Account information is loaded from the shared IMS account and profile data.*
- Priority**: Three buttons labeled **Low**, **Medium** (which is selected), and **High**.
- Assigned by**: A text input field showing **Test Connection (you)**.
- Assign task**: A dark blue button.
- Success message**: A green box at the bottom containing the text: **✓ Task assigned to Test Connection (Medium priority).**

Figure 2. Required-field validation prevents incomplete task creation.

After valid submission, the interface displayed a success confirmation and reset the form for the next assignment.

The screenshot shows the Mentor interface after a successful task assignment. The top navigation bar includes the **IMS** logo and a user profile for **Mentor**. Below the navigation bar, there are two tabs: **Assign Task** (active) and **Review Progress**.

The **Assign task** section contains the following fields and controls:

- Task title ***: A text input field containing **Example_20 Sep**.
- Description ***: A text area containing **Example_20 Sep**.
- Due date ***: A date input field showing **21/09/2026**.
- Assigned intern ***: A dropdown menu showing **Test Connection**. Below it, a small note reads: *Account information is loaded from the shared IMS account and profile data.*
- Priority**: Three buttons labeled **Low**, **Medium** (which is selected), and **High**.

Figure 3. Successful Mentor Task Assignment confirmation and form reset.

3.2 Database Persistence

The shared Supabase tasks table was reviewed after submission. The newly created Example_20 Sep record was present with the expected due date and initial Assigned status.

id	created_at	title	description	due_date	status
04255a8d-de04-4d5e-85e1-52d48d11	2026-09-19 12:35:38.676752	Shared Data Test	Testing assignment using Team A acco	2026-09-20 00:00:00+00	In Progress
251fe299-97a1-48fb-8407-d7aa068f4e	2026-09-10 06:01:59.714025	Test Sprint 2 Task	Test task for Team 40 database connec	NULL	In Progress
273b05a4-43d7-4bb2-ac8d-360edefc	2026-09-19 12:03:31.482316	UX Assignment Test	Testing updated Mentor assignment UX	2026-09-20 00:00:00+00	In Progress
6de07b90-c810-4e04-9820-09ff670b	2026-09-20 08:42:35.00585	Example_20 Sep	Example_20 Sep	2026-09-21 00:00:00+00	Assigned
846840f8-49fc-43d3-b0b6-3b9cf97a	2026-09-19 16:28:31.801671	Review task	Task created for review	2026-09-22 00:00:00+00	In Progress

Figure 4. Supabase tasks table confirms the new Example_20 Sep task was persisted with status Assigned.

The same database record showed Medium priority together with stored assigned_intern_id and assigned_by_mentor_id references.

id	status	priority	assigned_intern_id	assigned_by_mentor_id	updated_at
00:00:00+00	In Progress	High	cd8ac10e-1480-4237-97aa-711...	cd8ac10e-1480-4237-97aa-711...	2026-09-19 13:12:24.4
	In Progress	High	cd8ac10e-1480-4237-97aa-711...	cd8ac10e-1480-4237-97aa-711...	2026-09-19 15:21:18.2
00:00:00+00	In Progress	High	cd8ac10e-1480-4237-97aa-711...	cd8ac10e-1480-4237-97aa-711...	2026-09-19 15:10:07.1
00:00:00+00	Assigned	Medium	cd8ac10e-1480-4237-97aa-711...	cd8ac10e-1480-4237-97aa-711...	2026-09-20 08:42:35.5
00:00:00+00	In Progress	High	cd8ac10e-1480-4237-97aa-711...	cd8ac10e-1480-4237-97aa-711...	2026-09-19 16:28:57.7

Figure 5. Supabase record confirms status Assigned, Medium priority and stored Intern/Mentor references.

3.3 Intern Task Viewing and Status Transition

The Intern My Tasks view was then opened. Example_20 Sep appeared in the list with the expected due date, Assigned status and Medium priority.

ID	Task Name	Due Date	Status	Priority
04255a8d	Shared Data Test	Due 20/9/2026	In Progress	High priority
273b05a4	UX Assignment Test	Due 20/9/2026	In Progress	High priority
6de07b90	Example_20 Sep	Due 21/9/2026	Assigned	Medium priority
846840f8	Review task	Due 22/9/2026	In Progress	High priority
251fe299	Test Sprint 2 Task	Due No due date	In Progress	High priority

Figure 6. Intern My Tasks view shows Example_20 Sep with Assigned status and Medium priority.

Opening the task displayed the expected stored metadata and provided the Start task action while the status was Assigned.

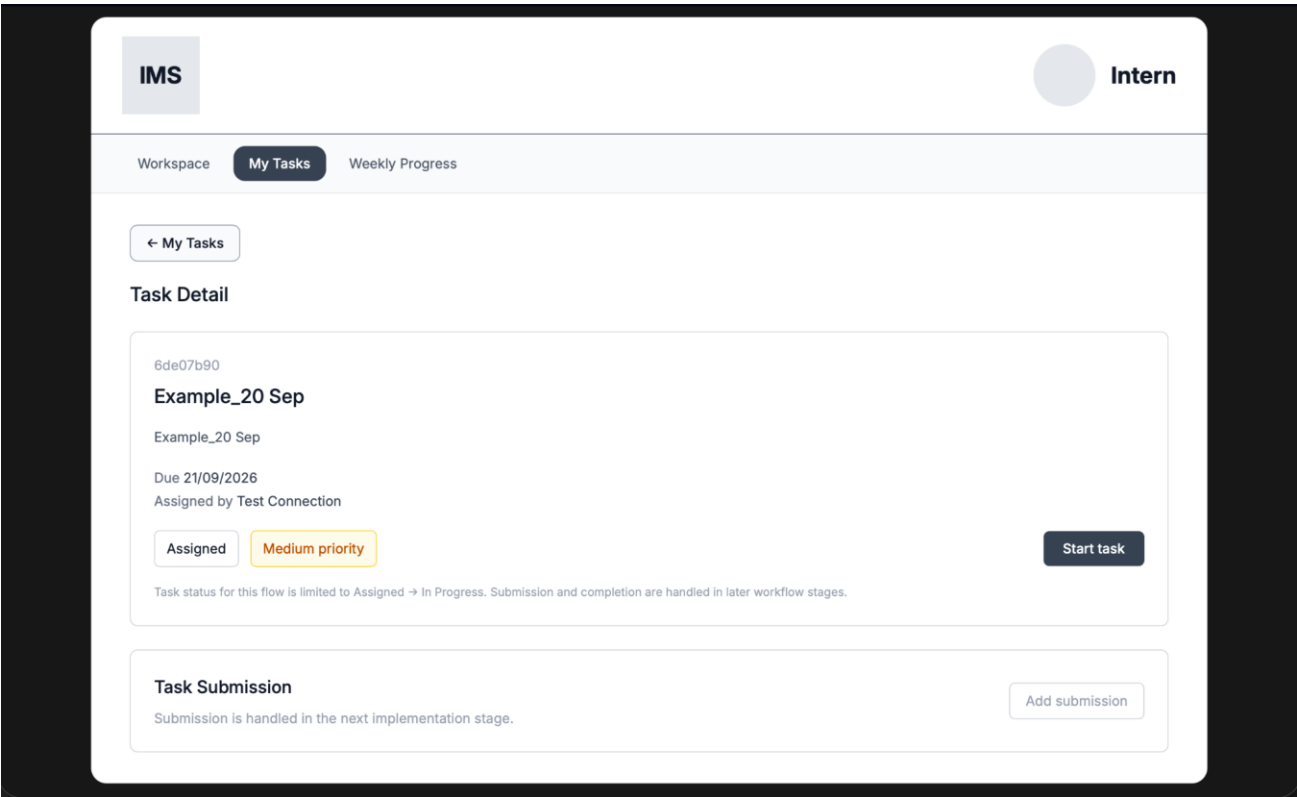

Figure 7. Intern Task Detail shows the stored task data before starting work.

Selecting Start task successfully changed the task status to In Progress.

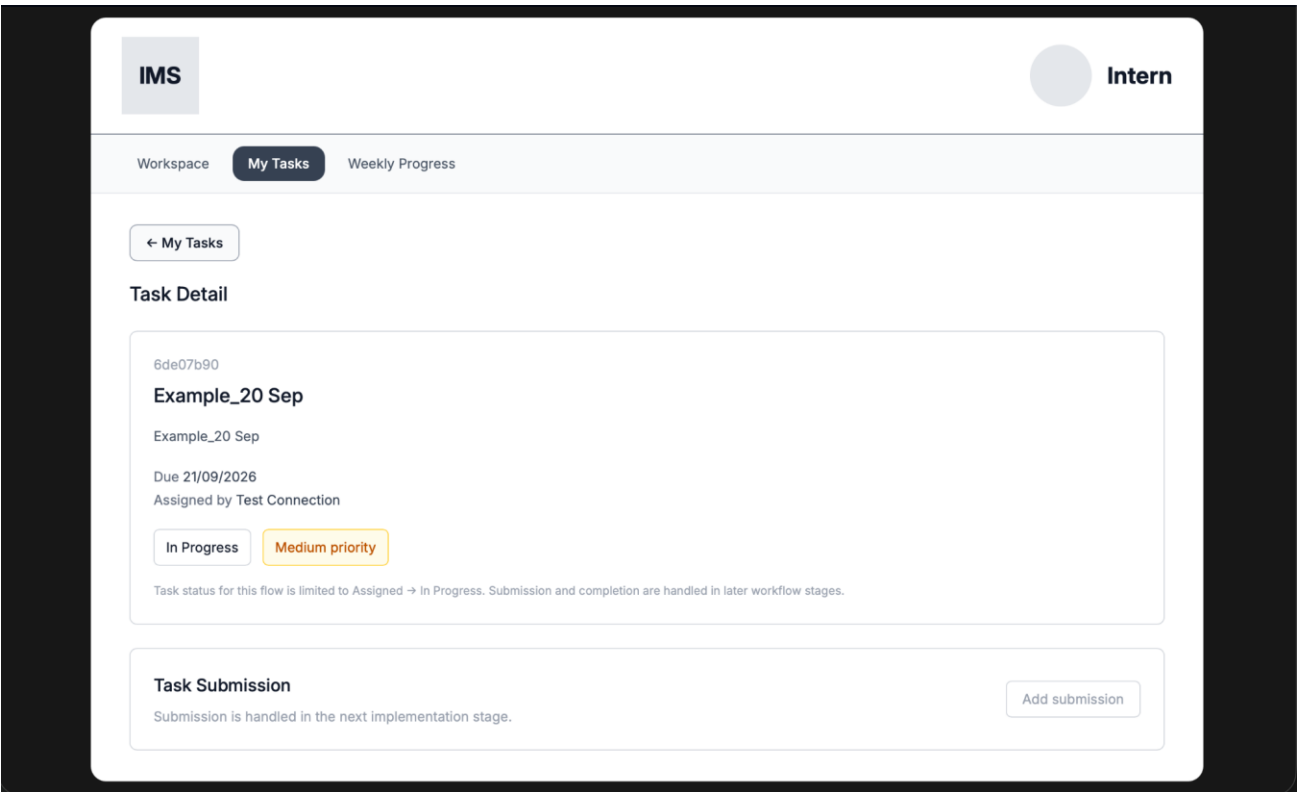

Figure 8. Task status successfully changes from Assigned to In Progress.

4. Overall Outcome

The tested Week 1 Mentor-to-Intern Task Management flow operated successfully for the scenarios evidenced above. Mentor task assignment, required-field validation, Supabase persistence, Intern task visibility, task-detail display and the Assigned → In Progress transition all produced the expected results.

No functional defect was identified in the tested scenarios. Any additional role/access-control or broader shared-IMS integration behaviour not demonstrated in this evidence set should be assessed separately when the relevant integrated environment is available.
