Sprint 3 — Promoted Intern Core MVP End-to-End Regression BA Acceptance Testing

Project: Intern Management System for Social Enterprise Workforce Development
Client: Food Systems Collective (FSC)
Team: Team 40 / Team B
Role: Business Analyst
Business Analyst: Shakthijhaa Sivagnanam
Student ID: s4065078
Task: Promoted Intern End-to-End Core MVP Regression Validation
Sprint: Sprint 3
Review date: 18 October 2026
Document status: FINAL BA REGRESSION EVIDENCE

1. Purpose and Review Basis

This document records the Business Analysis end-to-end regression testing of the existing Team B Core MVP using the promoted Intern account and an authorised Mentor account. The purpose is to confirm that the newly onboarded Intern can participate in the established workflow after Applicant-to-Intern promotion without breaking task management, Weekly Progress, Mentor review or role-access restrictions.

The regression run used the promoted Intern identity devtest@gmail.com, displayed as “dev test”, together with the Team 40 Test Mentor account. Testing was performed directly against the deployed frontend on 18 October 2026. PASS is recorded where the observed deployed behaviour matched the expected workflow; FAIL would be used for a reproducible requirement mismatch; BLOCKED would be used only where the available environment or data prevented validation.

This report records browser-visible functional and access outcomes from the deployed application. No password values are included, and no direct database modification or separate API penetration test was performed.

2. Test Environment and Evidence

- Deployed frontend under test: https://intern-management-system-frontend-pi.vercel.app/.
- Browser: Google Chrome on macOS, using separate normal and Incognito sessions for Mentor and promoted Intern testing.
- Authorised Mentor identity: Team 40 Test Mentor.
- Promoted Intern identity: devtest@gmail.com — displayed as “dev test”.
- Regression task: S3 Promoted Intern Regression Test, Medium priority, due 25 October 2026.
- Evidence set: EV01–EV09, captured from the deployed application on 18 October 2026.
- Scope: Mentor task assignment, promoted Intern task lifecycle, Mentor completion, Weekly Progress retrieval/lock state, Mentor Weekly Progress review and role-access restrictions.

3. Acceptance Review Summary

PASS	FAIL	BLOCKED	Criteria assessed
9	0	0	9

Overall BA position: The promoted Intern Core MVP regression pass completed successfully for all tested scenarios. The authorised Mentor assigned work to the promoted Intern, the Intern received and progressed the task through the expected lifecycle, the Mentor reviewed and completed the submitted work, the current-week Weekly Progress state remained available to both roles, and both wrong-role workspace attempts were denied with 403 access outcomes. No confirmed regression defect was identified in the tested scope.

4. Acceptance Matrix

ID	Acceptance focus	Result	Evidence	BA finding
RG-01	Mentor assigns task to promoted Intern	PASS	EV01	Mentor task assignment succeeded for dev test with Medium priority.
RG-02	Promoted Intern receives assigned task	PASS	EV02	The promoted Intern My Tasks view displayed S3 Promoted Intern Regression Test in Assigned state.
RG-03	Assigned → In Progress	PASS	EV03	The promoted Intern started the assigned task and reached In Progress with the submission form available.
RG-04	In Progress → Submitted	PASS	EV04	A valid Submission Description was accepted and the task moved to Submitted for Mentor review.
RG-05	Mentor review and completion	PASS	EV05	The Mentor reviewed the submission and marked the promoted Intern task Completed.
RG-06	Weekly Progress current-week state	PASS	EV06	The current reporting week was already submitted and locked, confirming the one-submission-per-week state remained functional.
RG-07	Mentor Weekly Progress review	PASS	EV07	The Mentor retrieved the promoted Intern's submitted Weekly Progress for the same reporting week as read-only information.
RG-08	Intern denied Mentor workspace	PASS	EV08	The promoted Intern's direct request for Mentor functionality was redirected to /unauthorized with a 403 message.
RG-09	Mentor denied Intern self-service workspace	PASS	EV09	The Mentor's direct request for the Intern workspace was redirected to /unauthorized with a 403 message.

5. Detailed BA Findings

5.1 Mentor Task Assignment — PASS

The authorised Mentor successfully assigned S3 Promoted Intern Regression Test directly to the promoted Intern identity "dev test". The application confirmed the assignment and retained the system-derived Team 40 Test Mentor identity. This demonstrates that the promoted Intern can participate in the existing Mentor-to-Intern task-assignment workflow.

5.2 Promoted Intern Task Receipt and Submission Lifecycle — PASS

The promoted Intern received the regression task in My Tasks as Assigned. After starting the task, the state changed to In Progress and the Task Submission controls became available. A valid Submission Description was then accepted and the task moved to Submitted for Mentor review. This confirms that the promoted Intern can use the established Intern task workflow without a post-onboarding regression.

5.3 Mentor Review and Completion — PASS

The Mentor Review Progress view retrieved the submitted regression task for dev test, displayed the submitted Description and allowed the Mentor to mark the task Completed. The Completed state and success confirmation were visible in the deployed interface.

5.4 Weekly Progress and Mentor Review — PASS

The promoted Intern Weekly Progress page showed the 18 October 2026 reporting week as already submitted and locked, with the message that only one submission per week is allowed. The existing submitted values remained visible. The Mentor Review Progress view retrieved the same reporting week and displayed Accomplishments, Blockers and Next steps as a Submitted read-only record. Because the current week was already submitted, no duplicate submission was attempted during this regression run.

5.5 Role-Access Restrictions — PASS

Two role-mismatched navigation checks were performed. The promoted Intern could not access the Mentor workspace, and the Mentor could not access the Intern self-service workspace. Both attempts produced the deployed /unauthorized page with a 403 "You cannot access this page" message. These results confirm the expected browser-level role separation remained effective after the promotion/onboarding changes.

6. Final BA Acceptance Outcome

The promoted Intern Core MVP end-to-end regression is accepted for the tested deployed scope. All nine regression criteria passed, with zero FAIL and zero BLOCKED outcomes. The promoted Intern could receive Mentor-assigned work, progress and submit the task, participate in the existing Weekly Progress experience, and remain subject to the same role-specific access boundaries as other Intern users. The authorised Mentor could review both task and Weekly Progress information and complete submitted work. No confirmed regression defect was identified during this acceptance pass.

Appendix A — Regression Testing Evidence

The following screenshots were captured during the 18 October 2026 deployed regression run and provide direct evidence for the PASS findings recorded above. Only the evidence required to support the regression outcome is included.

EV01 — Mentor assignment succeeds for promoted Intern

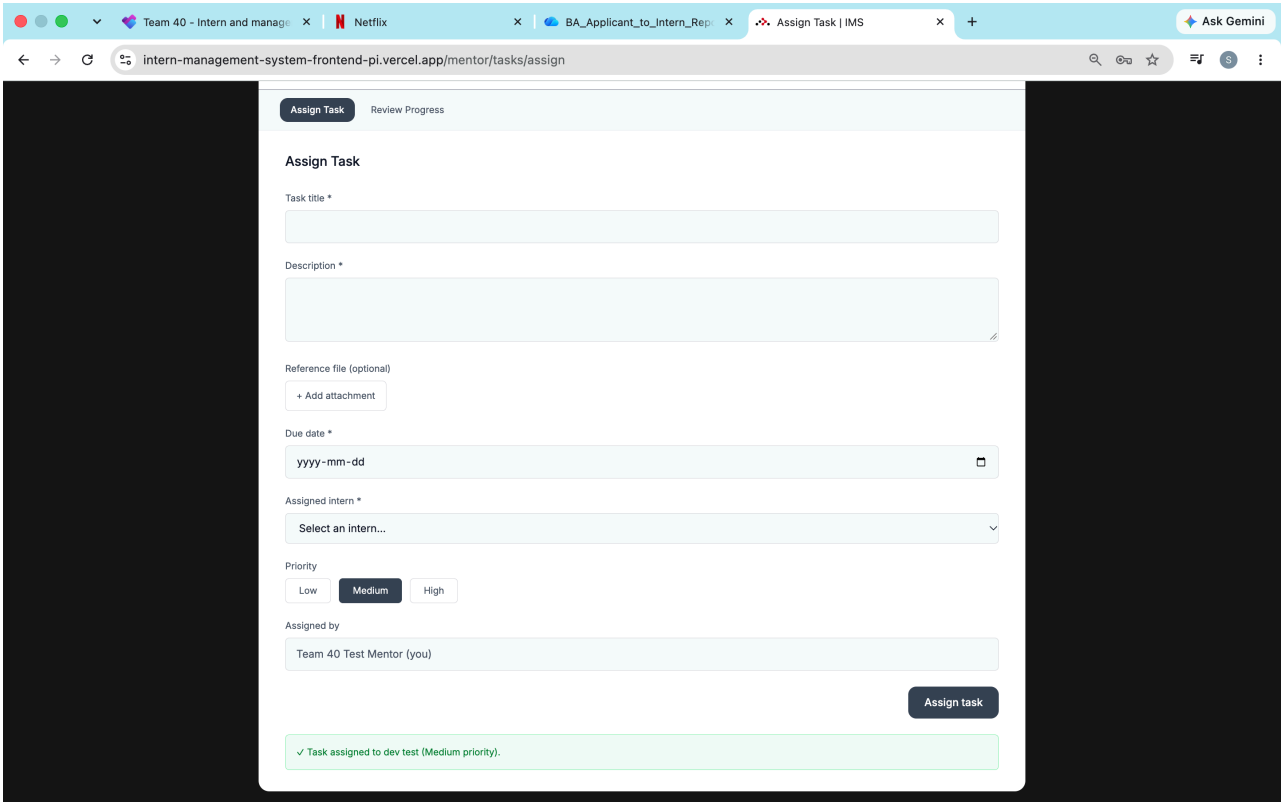

Figure 1. Mentor task assignment succeeds for dev test with Medium priority.

EV02 — Promoted Intern receives assigned task

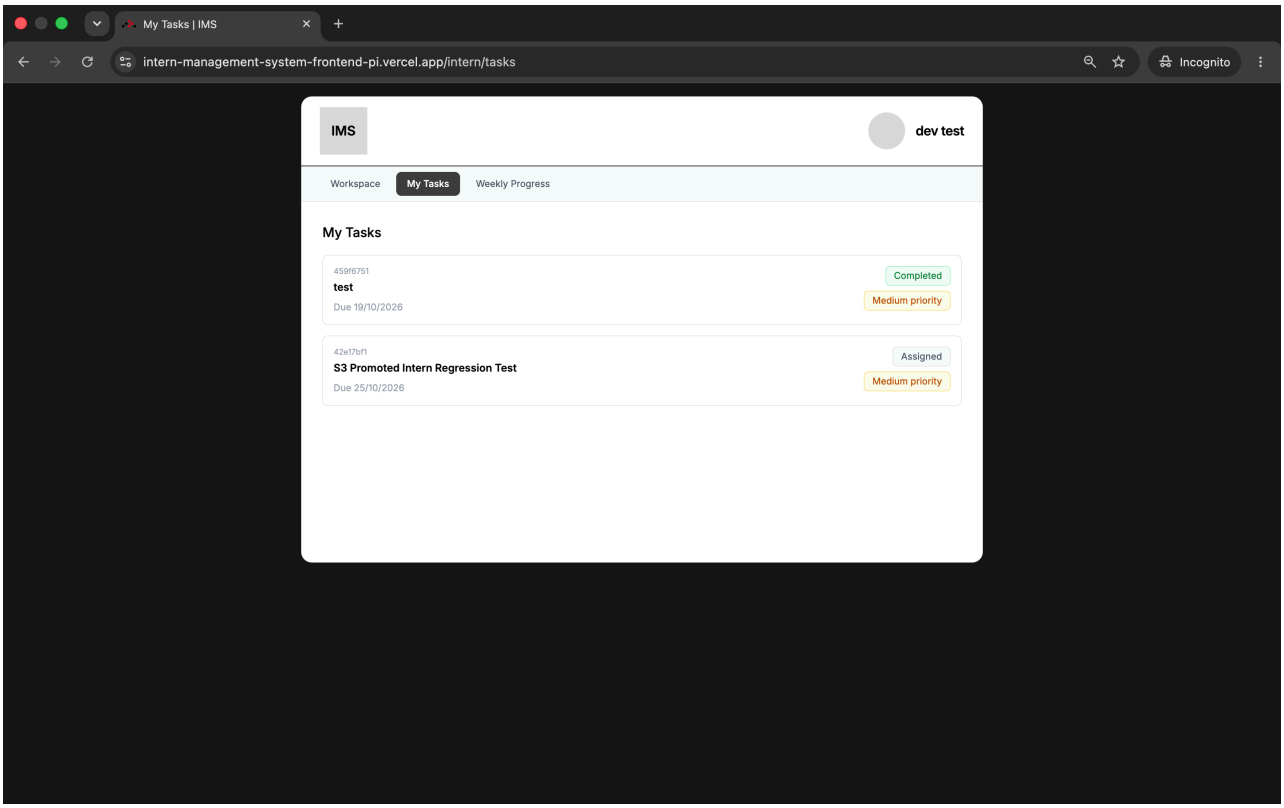

Figure 2. dev test My Tasks shows S3 Promoted Intern Regression Test in Assigned state.

EV03 — Promoted Intern starts task

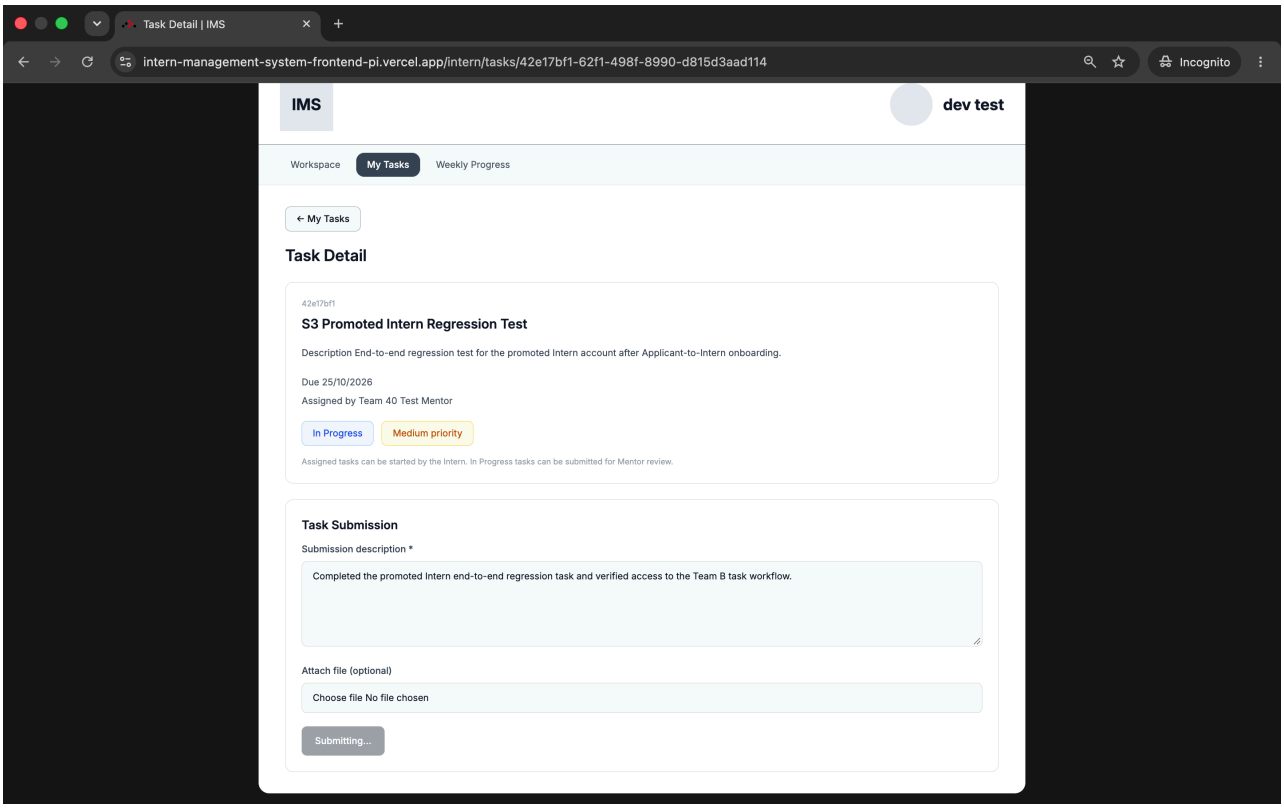

Figure 3. Task Detail shows In Progress and the promoted Intern Task Submission form.

EV04 — Promoted Intern submits task

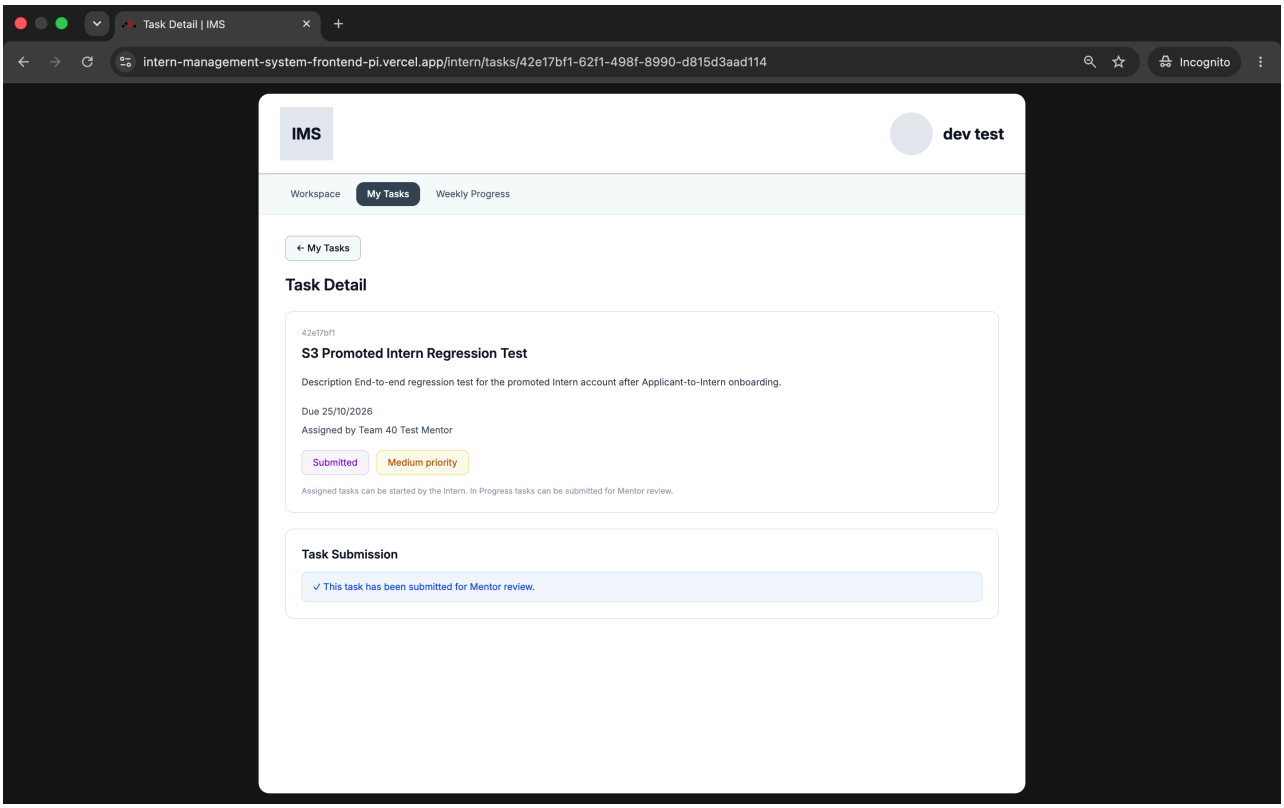

Figure 4. Valid submission moves the regression task to Submitted for Mentor review.

EV05 — Mentor reviews and completes task

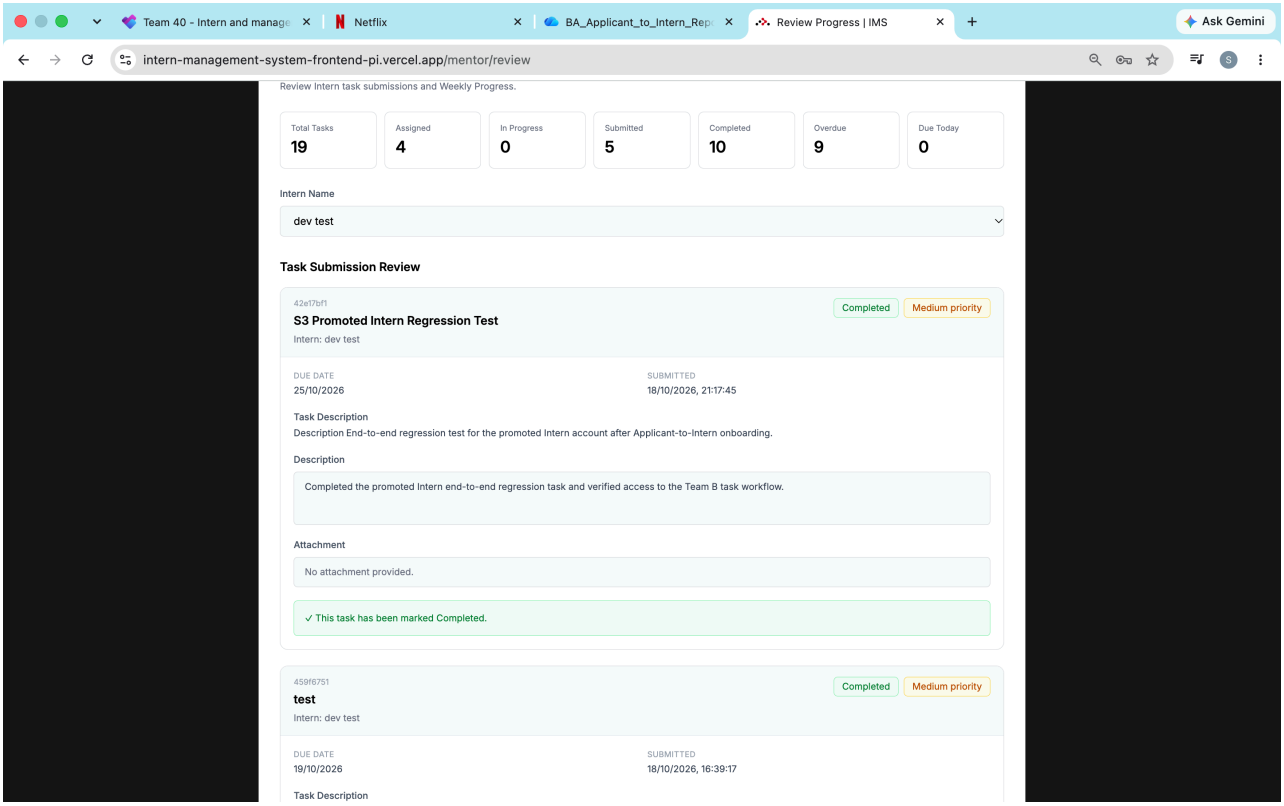

Figure 5. Mentor Review Progress shows the regression task Completed with submitted content retained.

EV06 — Promoted Intern Weekly Progress current-week state

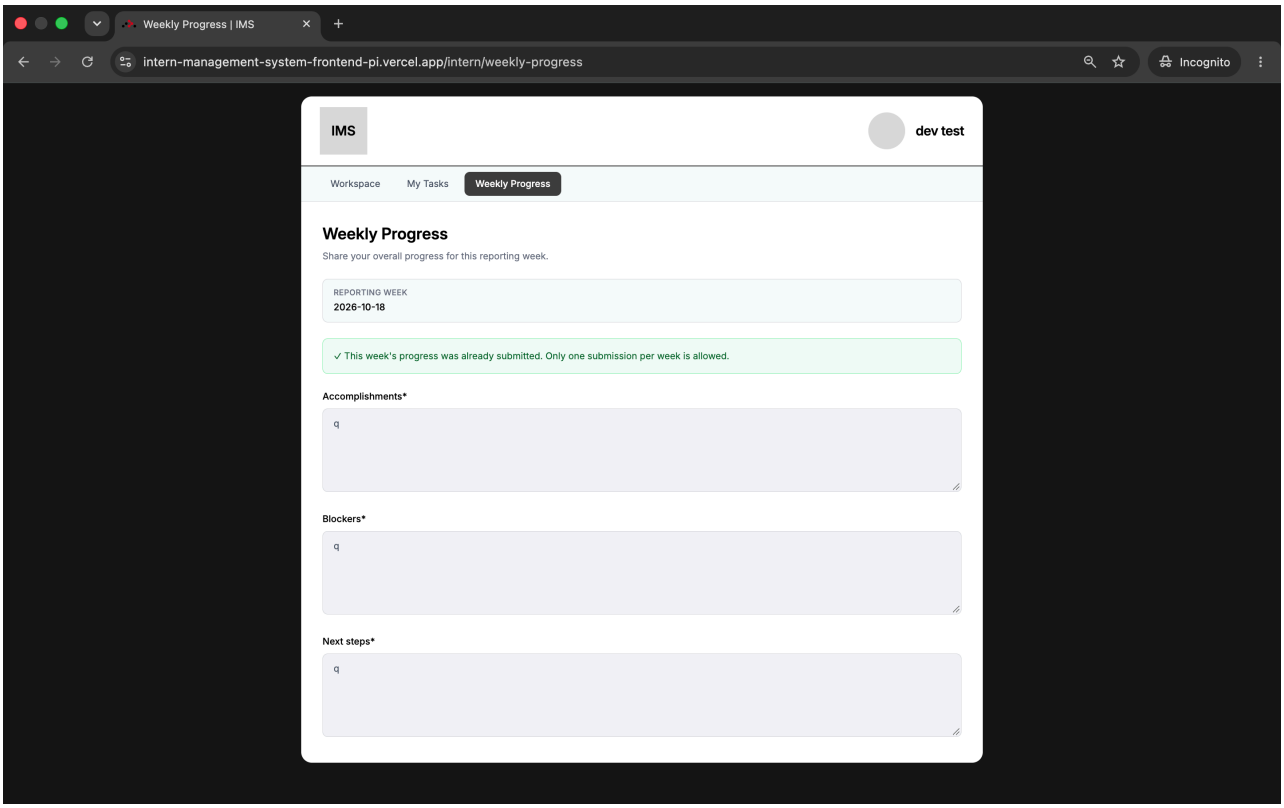

Figure 6. Weekly Progress for 18/10/2026 is already submitted and locked to one submission for the week.

EV07 — Mentor reviews promoted Intern Weekly Progress

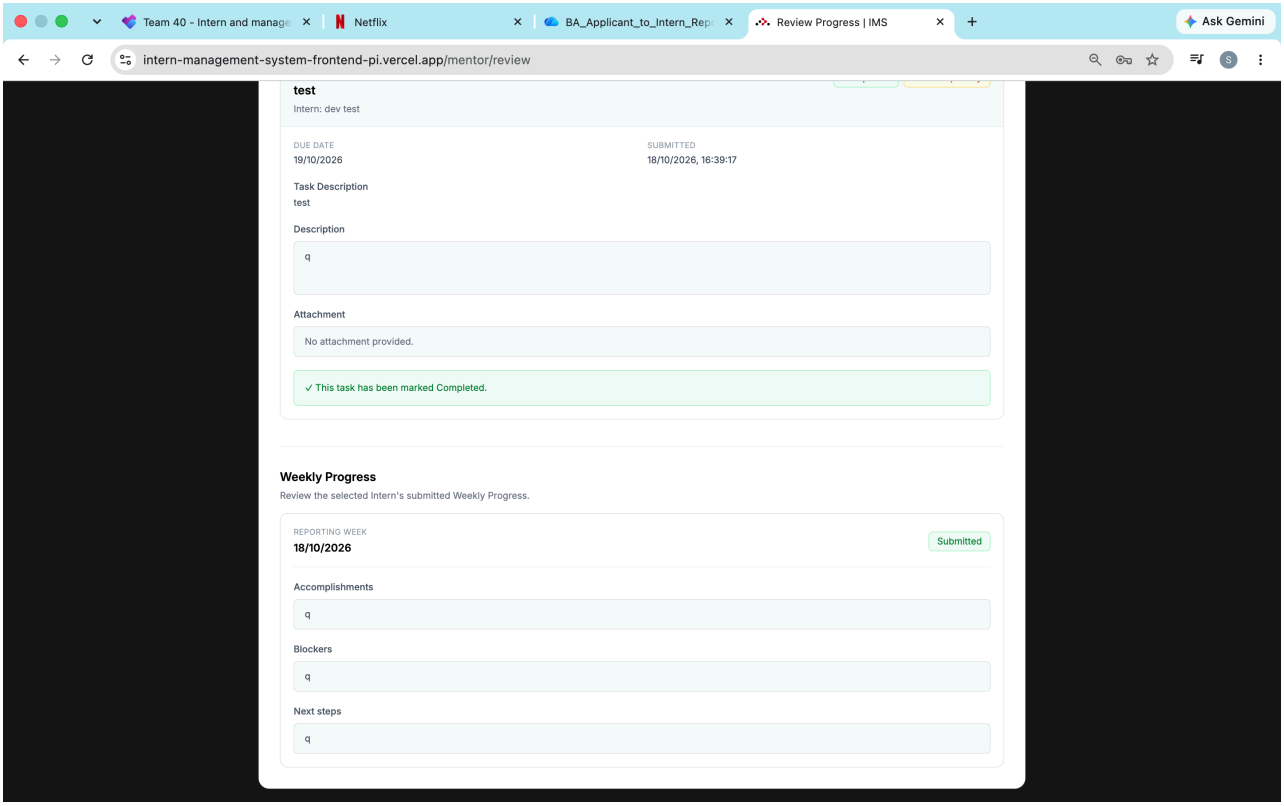

Figure 7. Mentor Review Progress displays the promoted Intern's submitted Weekly Progress for 18/10/2026.

EV08 — Promoted Intern denied Mentor workspace

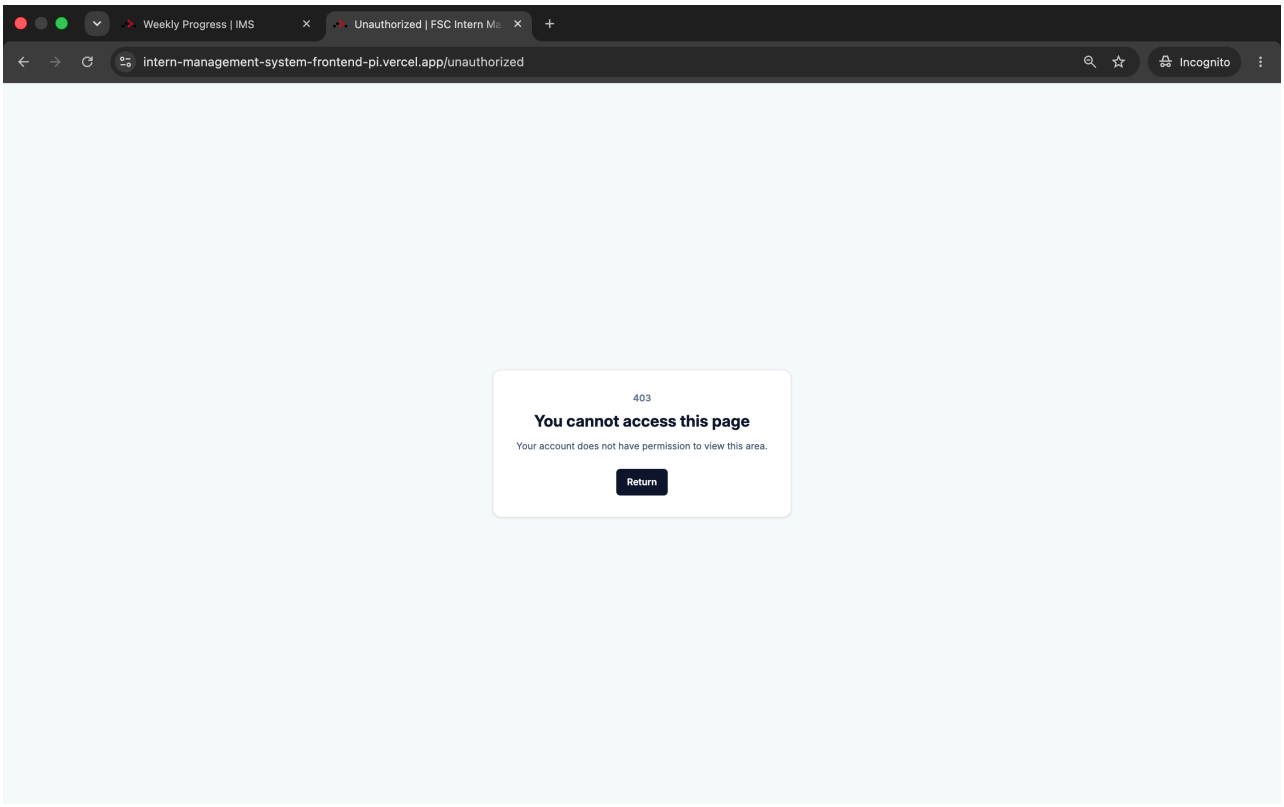

Figure 8. The promoted Intern receives the 403 /unauthorized outcome when attempting Mentor-only access.

EV09 — Mentor denied Intern self-service workspace

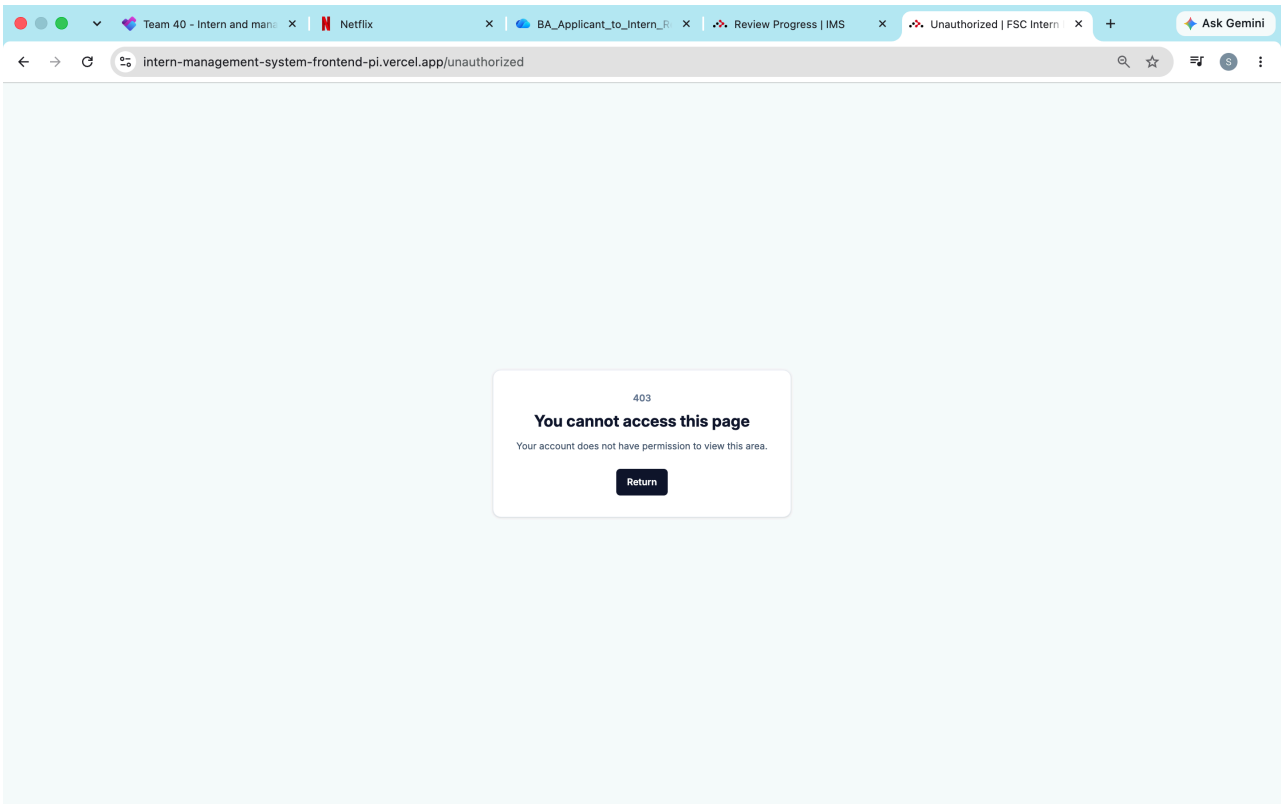

Figure 9. The Mentor receives the 403 /unauthorized outcome when attempting the Intern workspace.
